In The News:

On July 23rd, the SEC voted in favor of adopting amendments to Rule 2a7 that govern money market funds. The SEC does not regulate GF1 or other state-managed local government investment pools (LGIPs). How these amendments to Rule 2a7 will impact state-sponsored LGIPs has yet to be determined. The Office of the State Treasurer is working in concert with the National Association of State Treasurers (NAST); National Association of State Auditors, Comptrollers, and Treasurers (NASACT); and, the Governmental Accounting Standards Board (GASB) to determine whether operational changes will be required for GF1 and other stable NAV LGIPs.

Portfolio Strategy:

GF1 is designed to maximize current income while preserving principal and providing daily liquidity. GF1 is managed to maintain a \$1.00 value and a weighted average maturity of 60 days or less, with the maximum maturity of any investment limited to 397 days. The GF1 weighted average maturity (WAM) was 64 days as of July 31, 2014. Repo rates averaged 6.8 bp for the month of July. In July, we maintained a barbell strategy combining overnight repo positions and negotiated investment deposit agreements available upon demand at an average yield of 21 basis points with 9-month to 1-year agencies.
